

# Stryker A1 Medium Caliber Weapon System (MCWS)

- In 2018, Land Systems was proud to rapidly deliver (with our Kongsberg Defense partners) 30mm lethality to the U.S. Army's Stryker fleet with the ICV-Dragon.
- Now in 2020, Land Systems is proud to offer the Stryker MCWS – upgraded based on two years of Soldier experience and fully integrated on the new Stryker A1 chassis.
- Selected upgrades, based on warfighter feedback, include:
  - Enhanced 360-degree situational awareness w/video switching
  - Redesigned squad leader/driver hatch
  - Redesigned 7.62mm coaxial MG under armor
  - Relocated smoke grenade launchers
  - Enhanced stowage
- Land Systems delivered a range-tested, production-ready bid sample in August
- With First Unit Equipped projected in 2023, the Stryker MCWS is production-ready!

Live Fire - July 2020
